

# New Technology for Partial Hand Amputees

Increased daily functionality for amputees previously unserved

---

## Features

- Provides function to amputees seeking replacement of 1 to 5 digits
- Myoelectric system supplies patient with full digit function
- Digits wrap around items in grasp so patients can pick up bottles, cups, and cans
- "Stall Feature" allows amputees to point single digits for typing, pointing or the use of an ATM
- System can allow for precision index-thumb prehension
- Sockets are custom-designed and fabricated for each individual patient's needs
- Software interface allows Touch Bionics' clinicians to customize the function for each amputee
- Digits are covered with a lifelike functional aesthetic restoration
