

Prosthetic and Orthotic Associates  
Cranial Evaluation Guide

## Brachycephaly

### Cephalic Ratio Scale

Between 80-90 = Typical range, no helmet

Over 91 = Meets threshold for helmet

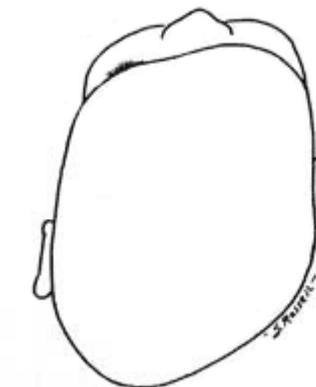

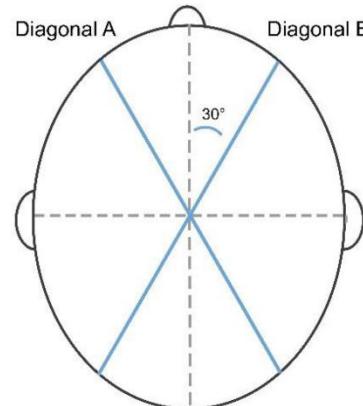

91-94 = Mild Severity

95-99 = Moderate Severity

100+ = Highest Severity

Today's Measurement = \_\_\_\_\_

## Plagiocephaly

### Diagonal Asymmetry Scale

6mm or below = Typical range, no helmet

10mm or higher = Meets threshold for helmet

10-14mm = Mild Severity

15-19mm = Moderate Severity

20mm+ = Highest Severity

Today's Measurement = \_\_\_\_\_
